

How does the Contributor Page work?

Each time a collection in your data source is published to Research Data Australia (RDA) with a new RIF-CS registryObject group attribute, the system auto generates and publishes a basic contributor page for you with a title based on the literal of the group attribute.

The XML example below shows 'Demonstration University' as the group title which will also be the title of the Contributor Page.

```
<registryObject group="Demonstration University">
  <key>43p7lhjppjhlku</key>
  <originatingSource type="">https://test.ands.org.au</originatingSource>
  <collection type="collection">
    <name type="primary">
      <namePart>Antarctic Map Layers 2016</namePart>
    </name>
    ...
  </collection>
</registryObject>
```

The generated page contains some basic information which is auto populated from a generic template. This includes a block of text in a Research Data Profile section which is populated with some details of your records in RDA.

Research Data Profile

To date, Demonstration University has 8 data records in Research Data Australia, which cover 6 subjects areas including ACCOUNTING, AUDITING AND ACCOUNTABILITY, COMMERCE, MANAGEMENT, TOURISM AND SERVICES and ENGINEERING. 3 research group(s) have been actively involved in collecting data and creating metadata records for the data. All the data records, people, projects, grants and services associated with Demonstration University can be accessed from the box on the right hand side of this page.

Research Data Profile section showing populated number of collections, top occurring subjects and number of party records of type group

- Once your contributor page is generated you can use the Contributor Page CMS in RDA to embellish your page with additional content and a logo.
 - If you choose to add a logo it will be displayed in the title section of all your records and also be used on the 'Who Contributes to Research Data Australia' page in RDA.
 - For more information on customising your contributor page please refer to the Customisation section of this document.
- No additional work is required to link all your records to your contributor page in RDA. A link pointing to the contributor page will be auto populated in the title section of your records which share the same group attribute.

 Dataset

Antarctic Map Layers 2015
Demonstration University 
Sarah Conner (Group E) (Principal Investigator of)

f t s Viewed: 1

Example of a link to Contributor Page where no logo has been added to the Contributor page.

The screenshot shows a contributor page header. On the left is a logo consisting of a red arrow pointing to a colorful circular graphic. To the right of the logo, the text reads: 'Antarctic Map Layers 2015', 'Demonstration University', and 'Sarah Conner (Group E) (Principal Investigator of)'. In the top right corner, there is a 'Dataset' icon. In the bottom right corner, there are social media icons for Facebook, Twitter, and LinkedIn, followed by the text 'Viewed: 2'.

Example of a link to Contributor Page where a logo has been added to the Contributor page.

A link to all records which share the same [group](#) attribute will also be shown in the right hand column of your contributor page. This includes all [collections](#), [parties](#), [services](#) and [activities](#). Upon clicking a link users will be taken to a search results listing of all your records.
