

Release 12.1 (12 Apr 2014)

9April2014

The following ANDS Online Services, hosted in NeCTAR's National Servers Program (NSP), will be migrated to Full Service Phase (FSP) on Saturday, 12 April 2014. The migration is in accordance with NeCTAR's plan to host all services to the FSP infrastructure by the end of this month.

As such, these services will potentially be intermittently unavailable from **9:00am to 5:00pm (AEST) on Saturday, 12 April 2014**:

- Research Data Australia
- Identify My Data (PIDS)
- Cite My Data (DOI)
- ANDS Collections Registry will be in READ ONLY mode (no new harvests or record edits permitted)

IMPORTANT information for our partners and data source administrators:

As a result of the migration, the IP address of the harvester is changing to **103.6.253.17**.

We are aware that some data sources restrict access to their OAI-PMH provider by way of firewall/IP filter. These data source providers should ensure that they accept incoming connections from the new IP address (103.6.253.17) effective from 10:00am (AEST), 12 April 2014.

The Demonstration environment will not be impacted by the migration and will continue to be available to all users.

Please schedule your activities accordingly. For any comment or feedback, please email services@ands.org.au.
