

Contributor Page template

Every Contributor Page in Research Data Australia (RDA) is based on the same template (shown below).

The sections highlighted by a red outline in the image below are the sections which are automatically generated by the system and are shown by default in the basic Contributor Pages. The other sections will only be shown when you have added content to them via the CMS.

	<h1>Title</h1>
<p>An overview paragraph about the contributor.</p>	Contact Contact details for the contributor.
Research and Key Research Areas Text describing a contributor organisation's distinctive research portfolio and research strengths.	Links to the contributors records in Reserach Data Australia
Research Data Profile Text describing and highlighting the research data (and related parties, projects, and services) whose description the organisation has contributed to Research Data Australia. Note: This type of description will be auto generated for contributor pages by the system. Data providers can supplement this generated text with their own custom text by adding a description of this type. This custom text may highlight any significant collection initiatives or unique discipline data holdings perhaps related to the organisation's researchAreas (described above).	Organistaions & Groups Links to the contributors party records of type 'group'
Research Support Text describing specific data-related support services offered by the contributor organisation such as archives, repositories, data centres, metadata stores, high performance computing facilities, data-intensive instruments, e-research support centres, data management support services, etc.	Last 5 data records added Links to the last 5 collections added to Research Data Australia by the contributor
Subjects A listing of the subjects covered by the contributor's records	Identifiers Identifiers for the contributor (e.g. NLA ID)
