

Release 24 (5 July 2017)

Release 24 of ANDS Online Services is scheduled for implementation on 5 July 2017 from 8:00am to 12pm. During the implementation, the following services will be unavailable:

- Research Data Australia (RDA)
- RDA Registry
- ANDS DOI Service
- Research Vocabularies Australia (RVA)
- ANDS Handle Service

Research Data Australia (RDA)

- Fix the issue with the display of some special characters in RDA
- Update subject resolution in RDA such that only language codes with correct correct types (ISO 639) are resolved to their string names
- Implement a fix to prevent duplicate records from displaying as additional related objects in an Activity view page
- ARC and NHMRC grants refresh

RDA Registry

- Fix the issue with the Harvester dying unexpectedly preventing completion of scheduled harvests
- Fix a validation error bug when editing a record with more than 30 relatedObjects/relatedInfo

DOI Service

- Implement a fix to the the DOI manual minting service to ensure updates are processed only when both URL and XML pass validation
- Reactivate deactivated DOI on post of new metadata to keep in sync with DataCite
- Enhance CMD DOI request events to capture more transaction information

Handle Service (PIDS)

- As part a recent infrastructure migration project we have implemented a new service URL for the Handle Service (<https://handle.ands.org.au/pids>). While we will continue to support the previous URL but we encourage users of the service to migrate to the new URL when convenient. Please refer to the [Handle Service documentation](#) for more information.

Research Vocabularies Australia (RVA)

- Fix the display of the organisations in the RVA CMS 'Owner' field to also include the complete name of the organisation (e.g from 'ANDS' to 'Australian National Data Service (ANDS)')
- Improve the guidance text on the 'Provide Feedback' page in the RVA to provide clearer instructions
- Reword the tooltip/help text for the 'Top Concepts' section in the vocabulary metadata CMS
- Optimise Resource Mapping process to prevent timeouts when publishing large vocabularies

Other (Widget, Tools, APIs, etc.)

- ORCID Wizard: Update the API to prevent relatedInfo/identifier from being picked up as a collection(works) identifier

Please also note:

- As part of Release 24 ANDS will be migrating it's services.ands.org.au domain to a new host. This however should not impact any of our service consumers. If you have any concerns please get in contact before the 5th July.

A reminder email will be sent out on implementation day.

Please schedule your activities accordingly. For any comments or questions, please email services@ands.org.au. Thank you.
