

Release 20 (17 August 2016)

Release 20 of ANDS Online Services is scheduled for implementation early August 2016. This release implements a completely new logging, analysis and reporting infrastructure for ANDS systems and a number of Research Data Australia (RDA), Research Vocabularies Australia (RVA) and Tools bug fixes and enhancement requests received through the ANDS Service Desk.

Research Data Australia

- Logging and Reporting:
 - Implementation of ELK stack to support logging and reporting activities
- Search Engine Optimisation
 - Remove RDA Help Text from page template and load on demand to improve Google indexing of RDA pages
 - Develop a Googlebot version of RDA pages
- Record view page:
 - Implement a printable version of an RDA view page
 - Update the display of citationMetadata identifiers as hyperlinks where possible
 - Fix the display of RDA theme page badge for 'open data' tagged datasets
 - Revisit the logic for creating resolvable links for supported identifiers in RDA
- Search
 - Update '_text_' field in Search to 'fulltext'

Research Vocabularies Australia

- Fix alignment of RVA portal My Vocabs headings.

Tools

- DOI Broken Link Tool: Exclude deactivated DOIs when checking broken links.
- RDA Broken Link Tool: Ignore leading or trailing space(s) in the URL/URI.
